

SARU SOLDER AT A GLANCE

Saru Solder has used its inherited knowledge & Experience of multiple generations to expertise in the field of metals.

Our in-depth understanding of Tin as a primary metal & Bismuth, Indium, Lead, Zinc, Silver, Copper, Antimony as auxiliary metals have helped us to be flexible & adaptive in manufacturing unique combinations of these metals in multiple shapes.

Japanese Technology

SOLDER PROCESS

In our constant endeavour to keep abreast with the latest technological developments, Saru Solder has varied alloy combinations (Lead Free & Leaded) & shapes which have been customised to cater to various processes such as.

PROCESS	PRODUCT SHAPES
SMT	Paste
Spray Metallizing	Solid Wire
Reclaim / Recover	Anti-Dross/Machine
Thermal Management	Indium Seals, Photonic Packaging
Wave	Bar

SOLDER APPLICATIONS

To meet different solder applications, Saru Solder is committed to provide solutions for

- EMS
 - Automotive
 - Medical
 - Home Appliances
 - PC
 - Mobile
 - LED Lighting
 - Military
 - Aerospace
- Heat Sink
- Jewellery
- Plumbing
- Art & Craft
- Semiconductor
- Solar/Photovoltaic
- Robotic Soldering
